

SPECIALIZED INDUSTRIAL CONSTRUCTION

Need More Space? Look Up!

Create the clear height your operation needs without expanding your building footprint.

EXPAND UP - NOT OUT

MAKE MORE OF YOUR EXISTING FACILITY

Roof raising can create room for:

- Taller manufacturing equipment
- Additional clear height and storage capacity
- New or upgraded HVAC and ventilation
- Future production and facility upgrades

A roof raise can help you preserve the building, location and infrastructure you already have.

ROOF RAISING IS NOT ROUTINE CONSTRUCTION.

Structural integrity, temporary shoring, equipment rigging, building systems, equipment relocation and active operations must all be coordinated with precision.

Experience matters when the margin for error is small.

Heine Construction brings extensive roof lifting experience, design/build capability and direct oversight from feasibility through closeout.

BEFORE YOU BUILD OUT, FIND OUT IF YOU CAN BUILD UP!

A smooth project experience. Guaranteed.™

SCAN TO SEE
THE PROCESS

A CAREFULLY PLANNED PROCESS

The roof moves only after *all* the details are resolved.

Heine Construction coordinates engineering, equipment, trades, phasing and building systems so the lift can be executed with precision while helping minimize disruption to ongoing operations.

1

EVALUATE

Assess the existing structure, desired roof height, operational requirements, building systems and overall feasibility.

2

ENGINEER + PLAN

Define the lifting method, structural changes, reinforcement, MEP modifications, safety requirements, phasing and schedule.

3

PREPARE + RELOCATE

Reinforce the structure, install temporary supports, protect work areas and relocate or store equipment as needed.

4

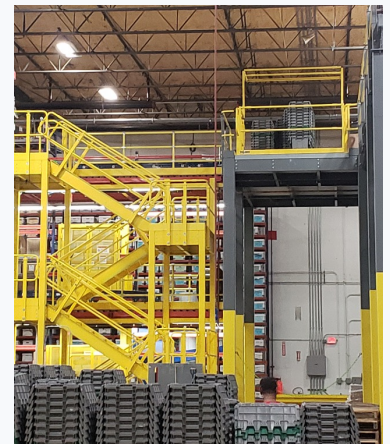

RAISE + MONITOR

Use specialized lifting equipment to raise the roof incrementally while monitoring the structure for movement, stress and stability.

5

REINFORCE + COMPLETE

Install permanent structural components, finish walls and roofing, reconnect affected systems, test, inspect and close out the project.

PLANNED AROUND
ACTIVE OPERATIONS

HIGH-STAKES PROJECTS REQUIRE EXPERIENCED HANDS.

Roof raising is specialized work. Heine Construction brings the experience and coordination needed to manage the structure, equipment, systems and active facility as one integrated project.

WHY HEINE CONSTRUCTION?

- Extensive roof lifting experience
- Design/Build expertise across trades
- Equipment relocation + storage capability
- Direct access to company ownership
