

SPECIALIZED HEALTHCARE CONSTRUCTION

Build for Care. Plan for Continuity.

Coordinate clinical spaces, equipment and building systems while planning around the needs of patients and staff.

PLAN AROUND CARE

KEEP CARE MOVING

Healthcare projects need a plan for:

- Patient and staff access during construction
- Equipment, utilities and room layouts
- Infection prevention and work-area containment
- Controlling noise, dust and disruption to daily operations

CLINICAL DETAILS SHAPE THE BUILD.

Healthcare spaces aren't generic commercial interiors. Clinical workflows, specialized equipment and building requirements need to be understood before construction begins.

The details that affect care need to be resolved before they affect construction.

Heine brings design/build oversight, trade coordination and direct access to ownership throughout the project.

PLAN THE PROJECT AROUND THE PEOPLE IT SERVES.

A smooth project experience. Guaranteed.™

PROJECTS

A CAREFULLY PLANNED PROCESS

Resolve clinical details before work begins.

Heine's process brings the people, systems and construction requirements together before they become problems in the field.

1

DEFINE THE NEED

Document the rooms, clinical workflows, equipment and patient access the facility requires.

2

COORDINATE DESIGN AND SYSTEMS

Align layouts, utilities and specialty equipment requirements with the design team.

3

PLAN THE WORK AROUND CARE

Sequence work zones, access and containment requirements with facility leaders.

4

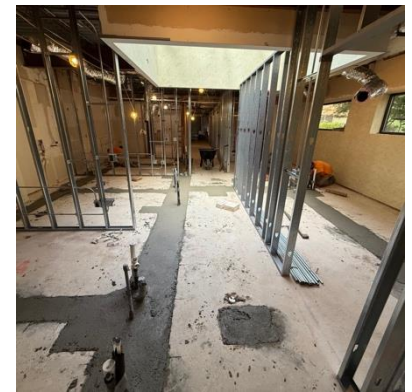

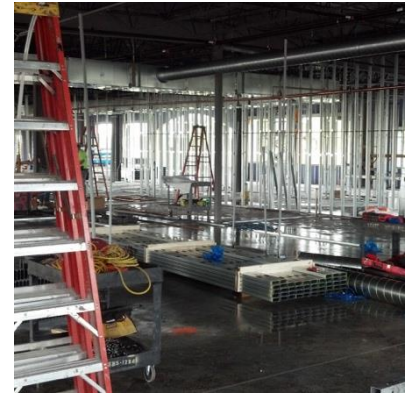

BUILD AND COMMUNICATE

Coordinate trades and update clinical staff about work that affects daily operations.

5

VERIFY AND HAND OVER

Review equipment connections, inspections and remaining work before the space is turned over.

PROOF IN THE DETAILS

Heine coordinates specialized equipment, building systems and clinical room layouts while planning construction around occupied areas so the finished space works as intended.

WHY HEINE CONSTRUCTION?

- Trade coordination
- Clear communication throughout construction
- Design/Build oversight
- Direct access to ownership
